Vision

- **To be a leading regional and global industrial group achieving sustainable growth and a strong presence in international markets.**

Mission

- **To deliver high-quality industrial products through integrated and diversified manufacturing facilities, utilizing advanced technologies and adhering to global quality standards to meet local and international market needs.**

Values

1. **Safety First**
2. **Quality Excellence**
3. **Sustainability & Circularity**
4. **Innovation & Continuous Improvement**
5. **Integrity & Compliance**
6. **Customer-Centricity**
7. **Employee Empowerment**
8. **Operational Reliability**
9. **Community Engagement**
10. **Profitability & Growth**
11. **teamwork**

Goals

- **Strengthen production capacity and technological capabilities across all group factories.**
- **Expand exports Globally.**
- **Build a global network of agents and distributors.**
- **Comply with international export standards and certifications.**
- **Diversify product portfolio to meet global market demands.**
- **Establish long-term international strategic partnerships.**

Eltigany Group

- **Eltigany trading group is one of the associated groups for decades, our products are spreaded all over africa And Some Asian Countries**
 - **Our group provides the markets with useful products specifically building tools, textile tapes, plastic rolls and ropes, and others.**

EGYTEX FOR YARNS PRODUCTION

1 - Continuous Filaments Polypropylene yarns

A Air Intermingled.

- Count: **6000 - 300** Denier.
- D.P.F.: **3 - 25** (Fine-Medium - Coarse)
- Tenacity: **3 - 7** gram/den (low - Medium & High)
- Cross Sections: Round And Delta
- Stabilized: UV Stabilized (upon request)
- Colour: Wide range of colours (upon request)
- Bobbin Size: **3 - 8** kgs

B Twisted Polypropylene yarns

- Count: **6000-300** Denier.
- D.P.F.: **3-25** (Fine-Medium - Coarse)
- Tenacity: **3-7** gram/den (low - Medium & High)
- Cross Sections: Round And Delta
- Stabilized: UV Stabilized (upon request)
- Colour: Wide range of colours (upon request)
- Bobbin Size: **3-8** kgs

2 - Texturized Polypropylene yarns (BCF)

- Count: **1600-6000** Denier
- DPF: **2.5 - 12**
- Stabilization : UV Stabilized (upon request)
- Cross sections: Round
- Colour: Mono colours, Tricolour, Multi colour
- Bobbin Size: Up to **5** kgs

3 - Polypropylene multifilament yarns

- A: **3 Or 4** Strand ropes from **10** mm up to **32** mm Diameter
- B: **8** Strand Planted ropes **28** mm up to **80** mm Diameter

4 - Twine Rope

- Count: **4-32** Diameter.
- Tenacity: **3-7** gram/den (low - Medium & High)
- Stabilized: (As Customer Order)
- Colour: Wide range of colours (As Customer Order)
- Formation: (As Customer Order)
- Weight: Standard **20: 25** kgm (As Customer Order)
- Special Order As Customer Order Mixed Colour

5 - woven Tapes

- Mixed Colour
- **100 %** Pp
- Width : **1.5: 6** cm
- Tenacity: **50:70** kgm/m
- Colour: As Customer Order

6 - Pp fiber

EGY TEX poly propylene fiber is a high-performance polymer-based fibrillated micro synthetic fiber reinforcement that provides effective crack control against short-term plastic shrinkage and long-term drying shrinkage with its 3dimensional homogeneous distribution property in concrete.

EGY TEX poly propylene fiber is locally manufactured from **100 %** virgin polypropylene.

MASR ELQANAL

FOR PLASTIC INDUSTRIES

FOR PLASTIC INDUSTRIES

Masr el Qanal is one of the biggest factories in Egypt in plastic industries since decades. Several types of plastic that is manufactured in different ways and processes are available.

MASR ELQANAL

FOR PLASTIC INDUSTRIES

1 - Green house film

Greenhouse plastic film rolls are our beloved field of industrial plastics. In Egypt and other countries of Africa you will easily find our products covers a large area of vegetable and fruits farms. Greenhouse plastic are mainly manufactured from high-quality pure resin with some other special additives to enhance its role in preventing harmful ultraviolet radiation and resist bacterial formation. Its available for Width of: **4 to 7** meters. And Thickness of 150 to 2000 microns. Color and other additives are detected as customer order.

2 - Silage Film

Silage films are specially designed to meet the needs of both farmers and animals, silage films protect forage in the same time it main the feed quality fixed.

3 - Packing film rolls

100% Polyethylene packing film roles are available in high quality and large quantities for order. Available width: **3 to 16** meter

4 - PE Geo-membrane (insulator)

Geomembrane is a waterproof barrier material with high molecular polymer as the basic new material, It has excellent resistance to environmental stress cracking, low-temperature resistance, aging resistance, corrosion resistance, and a large operating temperature range **(-60-+60)**, and long service life It is widely used in seepage prevention of domestic waste landfills, seepage prevention of solid waste landfills, seepage prevention of sewage treatment plants, seepage prevention of artificial lakes, tailingstremment, and other seepage prevention projects.

#Width: **4 m to 7 m**

#Thickness: **200** micron to **3** mm

Construction Film (LDPE)

B

GEO-Merberare (MDPE)

FOR PLASTIC INDUSTRIES

El joker is one of the trusted names in Rubber industry in Egypt and all Africa since 2018. We have a large scale production of inner tubes for Motorcycles, Tricycle And Toktok that are manufactured with experts hands that exert every possible effort to produce a special product that meet all customers needs. Recently, we have added outdoor mats to our products. All outdoor mats are 100 % produced from Rubber that are cured with some special chemicals to prevent bacterial formation.

LINAH Gold 100

A linear PVC sheet is a high-end, synthetic, single and double ply, waterproofing membrane, long-term performance and reliability. Stable polymer structure that prevents degradation, and its fully weldable seams are the gold standard for creating a monolithic, leak-proof barrier.

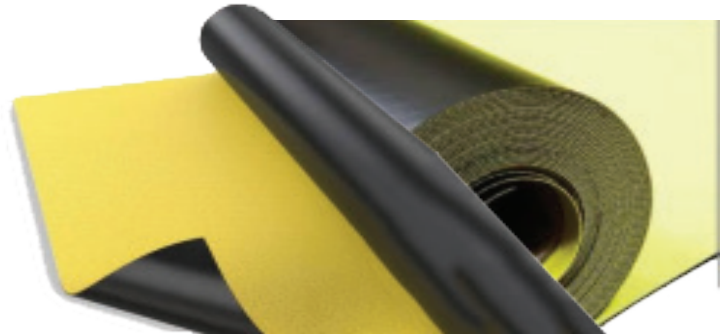

It is the go-to choice for architects and engineers for projects where longevity, chemical resistance, and proven performance are critical.

Available all colors , up to **3.2** m width , up to 2mm thickness.

LINAH PVC TARP

Is a heavy-duty, flexible sheet made from Polyvinyl Chloride (PVC), reinforced with a fabric mesh (usually polyester or scrim) for strength. Durable and versatile, designed for demanding industrial and commercial uses. Available all colors , available from 500 g/m² up to 900 g/m²

Advantages of PVC Tarpaulins

- antages of PVC Tarpaulins
- Superior Strength & Longevity: Can last for years even in harsh conditions.
- Excellent Weather Resistance: Performs well in storms, sun, snow, and wind.
- Customization: Easily fabricated with welded seams, brass grommets, roped edges, and custom sizes/colors.
- Repairable: Can be patched with PVC glue or heat-welded.

Advantages

- !Cost-Effective: Low cost per square foot for large prints.
- !Vibrant Graphics: Excellent print quality for photos and graphics.
- !Durable for Short-to-Medium Term: Withstands outdoor conditions for months to years.
- !Easy to Handle: Lightweight and easy to install with grommets or pole pockets.
- !Customizable: Available in many sizes, colors, and finishes.
